

English, Maths and Science

Boys at QEH Juniors have a daily Maths and English lesson.

The school uses the National Literacy and Numeracy Frameworks as a guide to inform planning and teaching. Many of our boys are working above the national expectations in Maths and English by the end of Key Stage 2.

Having two classes in each of Years 5 and 6 enables us to set the boys in Maths and English for their last two years at QEH Juniors, which further enhances the boys' levels of achievement and progress.

Our Learning Enhancement teacher supports boys with particular learning difficulties and dyslexic pupils are able to receive specialist private lessons in school with her.

Our Science curriculum has been specially tailored to stimulate the boys' natural interest in and enthusiasm for Science.
